SYBRON

As a consumer, a taxpayer, and business owner I strongly object to the continued harassment of Microsoft by the federal government, as well as by the state governments, because of Microsoft's successes. These suits are motivated by greed. The greed and jealousy of their competitors, and the greed of various government for a fast cheap undeserved buck.

When will the Governments learn to get off the backs of the most creative, motivated, dedicated, hardworking of its citizens who are the ones who strive to make, and have succeeded in making, this country great?
